1 Safety instructions

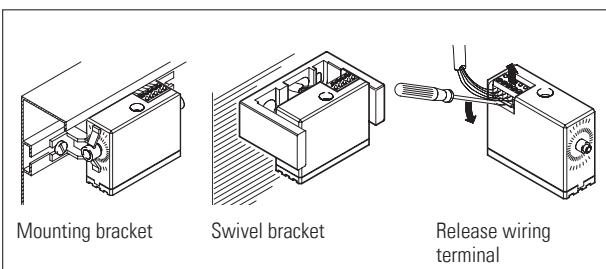

Observe the national and international regulations on door safety. Only trained, qualified personnel may mount and start up the detector. The unit may only be opened and repaired by the manufacturer. The unit may only be operated from a safety extra-low voltage (SELV) system with safe electrical separation.

Always consider the safety functions of your application as a whole, never just in relation to one individual section of the system. The installer is responsible for carrying out a risk assessment and installing the detector and the door system correctly. Avoid touching any electronic components. The door drive and transom profile must be grounded correctly.
